

PROPHECY

Platform for Rapid Deployment of Self-Configuring and Optimized Predictive Maintenance

www.prophecy.eu

Portfolio of leading-edge predictive maintenance service offerings for Industry4.0 and industrial internet of things era

PROPHECY created a multi sided platform for predictive maintenance services, expanded with stakeholders from affiliated projects and clusters, which provides a multitude of added value services and selected online offerings to the members. Online calculators and other tools are launched that can assist maintenance managers and operations executives to reach business decisions, estimate the cost-benefit of a predictive maintenance solution and the financial impact and ROI with hands-on quantifiable metrics.

a distribution channel of assets and service offerings stemming from PROPHECY and its extended affiliations

a promotion channel of predictive maintenance solutions, trainings, services, knowledgebase and activities

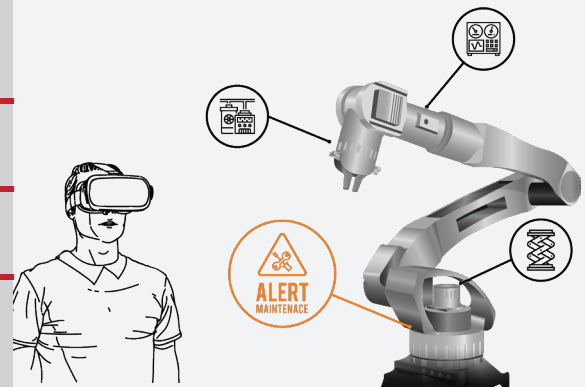

a multi-sided platform as an infrastructure of solid community creation

Our portfolio of solutions, tools and service bricks

have already been
successfully deployed in
use-cases in world-re-
nowned factories of Jaguar
Land Rover and PHILIPS.

**Register to our community, learn more about predictive
maintenance solutions and evaluate your activities!**
